

Are you interested
in issues that fall
at the intersection of
neuroscience, ethics,
and society?

Does cognitive
enhancement amount
to **cheating**?

Is free will an illusion?

Are we **born** with
empathy or villainy?

Can **brain scans** replace
standardized testing?

How does the brain think
morally (or immorally)?

BIOETH 505: NEUROETHICS

Spring 2015

Wednesdays 2:30-5:30p

Instructors:

Dr. John Banja

Dr. Gillian Hue

Dr. Karen Rommelfanger

*All disciplines welcome, background
in neuroscience or philosophy
appreciated but not required.
